

Wyoming Paid Firemen's Retirement Fund Plan A

Actuarial Valuation Report
for the Year Beginning January 1, 2018

April 6, 2018

Board of Trustees
Wyoming Paid Firemen's Retirement Fund Plan A
6101 Yellowstone Road
Suite 500
Cheyenne, WY 82002

Dear Board of Trustees:

Subject: Actuarial Valuation as of January 1, 2018

We are pleased to present the report of the actuarial valuation of the Wyoming Paid Firemen's Retirement Fund Plan A ("the Fund") for the plan year commencing January 1, 2018. This report describes the current actuarial condition of the Fund, determines the calculated employer contribution amount (the actuarially determined contribution amount), and analyzes changes in this contribution amount from the prior year. Valuations are prepared annually, as of January 1, the first day of the Fund's plan year.

Financing objectives and funding policy

Assuming the suspension of contributions to the Fund, investments are the only funding source for this plan. The purpose of this actuarial valuation is to determine what contribution requirement, in addition to investments, would be needed to meet obligations of the Fund. The projections indicate the year the trust is expected to be depleted and the liability remaining at that time. Projection results were produced under separate cover

If no further contributions are made, the valuation results indicate that the assets in the Fund could be depleted prior to fully settling the obligations of the fund.

Progress toward realization of financing objectives

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan's funded status. The funded ratio, based upon the assumption of 3.0% cost-of-living adjustment increases as of January 1, 2018, is 51.03%. This funded ratio was 60.42% as of January 1, 2017. On a market value of assets basis, the Fund's funded ratio decreased from 56.74% as of January 1, 2017 to 50.88% as of January 1, 2018. The funded status alone is not appropriate for assessing the need for future contributions. The funded status is also not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations.

Benefit provisions

The benefit provisions reflected in this valuation are those which were in effect on January 1, 2018. This valuation does include the liability for the automatic annual 3% cost-of-living adjustment. There were no changes in the benefit provisions since the prior valuation.

The benefit provisions are summarized in Appendix B of the report.

Assumptions and methods

Actuarial assumptions and methods are set by the Board, based upon recommendations made by the plan's actuary. The current assumptions used in the actuarial valuation were adopted by the Board effective August 23, 2017 and were first utilized with the January 1, 2018 valuation report. For a detailed description of the experience related to these assumptions, as well as the rationale for any changes, please see our latest Wyoming Retirement System Actuarial Experience Study Report. Our experience study report was dated January 10, 2018 and it covered the five-year investigation period ending December 31, 2016.

Below is a summary of the changes in assumptions:

1. **Inflation:** reduce the current assumption of 3.25% to 2.25%.
2. **Real rate of return:** increase the current assumption from 4.50% to 4.75%.
3. **Nominal rate of return:** decrease the nominal investment return assumption (the sum of inflation and the real rate of return) from 7.75% to 7.00%.
4. **Administrative expenses:** recommend reducing the assumed annual increase in expenses from 6.50% per year to 2.50%.
5. **Post-retirement mortality, disabled lives mortality, active life mortality:** update to the RP2014 table, projected generationally using MP 2017.

The assumption changes increased the accrued liability by \$23 million.

The results of the actuarial valuation are dependent upon the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution amounts and funding periods. The actuarial calculations presented in the report are intended to provide information for rational decision making. Due to the many factors affecting a retirement system, users of this report should be aware that contributions made at that rate do not necessarily guarantee long-term benefit security.

The employer contribution requirement in Table 1 of this report is determined using the actuarial assumptions and methods disclosed in Appendix A of this report. This report does not include a detailed assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of investment and other significant risks that may have a material effect on the plan's financial condition.

All assumptions and methods are described in Appendix A of the report.

Data

Member data for retired, active and inactive members was supplied as of January 1, 2018 by the Fund's staff. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data.

Asset and financial information as of January 1, 2018 was prepared by Wyoming Retirement System and is the responsibility of management. Eide Bailly, LLP provided us the asset and financial information and will opine on Wyoming Retirement System's statements.

Plan experience

As part of each valuation, we examine the Fund's experience relative to the assumptions. As experience in a given year deviates from the assumptions, a gain occurs if the liabilities grow slower than the assumption set anticipates and a loss occurs if the liabilities grow faster. This past fiscal year the Fund experienced a total loss on the unfunded actuarial accrued liability of approximately \$13.55 million, primarily due to contributions less than expected. The aggregate result of this is disclosed in Table 3 under Section III of the report.

Actuarial certification

All of the tables contained in this actuarial valuation report were prepared by Gabriel, Roeder, Smith & Company. Historical information for years prior to 2010 was prepared by the prior actuarial firm and was not subjected to our actuarial review.

We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Fund as of January 1, 2018.

All of our work conforms with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of state law and, where applicable, the Internal Revenue Code and ERISA. The undersigned are independent actuaries and consultants. Mark Randall and Leslie Thompson are Enrolled Actuaries and Mark Randall, Leslie Thompson, and Paul Wood are Members of the American Academy of Actuaries, and all three meet all the Qualification Standards of the American Academy of Actuaries.

Finally, all of the undersigned are experienced in performing valuations for large public retirement systems.

Respectfully submitted,
Gabriel, Roeder, Smith & Company

Mark R. Randall, FCA, EA, MAAA
Chief Executive Officer

Leslie Thompson, FSA, FCA, EA, MAAA

f. Projected payroll	\$134,155	\$134,155	\$195,221

SECTION II

DISCUSSION

Contribution Requirements

- Exhibits throughout this report are based primarily, unless stated otherwise, on the assumption of 3.00% cost-of-living adjustment increases (COLAs).
- The current funding policy of no member or employer contributions is not expected to sustain the plan over the long term with the current level of benefits. Over time, either additional funding will be needed or the current benefit expectations will have to be reduced.
- There were no changes to the benefit provisions since the prior valuation.
- The actuarial assumptions have been updated since the prior valuation. For a detailed description of the experience related to these assumptions, as well as the rationale for any changes, please see our latest Wyoming Retirement System Actuarial Experience Study Report.
- The amortization payment is based upon the following assumptions:
 - 10-year open funding period
 - Amortization payment amounts are calculated to remain level
- The analysis of the changes in the contribution rates is shown in Table 5 under Section III of the report
- The unfunded accrued liability increased from \$82 million to \$112 million.

Calculation of Contribution Amounts

The valuation determines the contribution requirement for the year. There is no scheduled funding for Plan A. The employer calculated contribution has three components:

- The normal cost (NC)
- The amortization of the (UAAL)
- The administrative expenses

The NC is the theoretical amount which would be required to pay the members' benefits if this amount had been contributed from each member's entry date and if the fund's experience exactly followed the actuarial assumptions.

The actuarial accrued liability (AAL) is the difference between (i) the actuarial present value of all future benefits for all current participants of the fund, including active, inactive and retired members, and (ii) the actuarial present value of future normal costs. Thus the AAL represents the liability associated with past years. The unfunded actuarial accrued liability (UAAL) is the difference between the AAL and the actuarial value of assets (AVA). It is the shortfall/excess between the liability associated with prior years (the AAL) and the assets actually accumulated (the AVA). This shortfall/excess can arise from several sources, including actuarial gains and losses which are caused by differences between actual experience and the plan's assumptions, changes to the plan's actuarial assumptions, and amendments to the benefit provisions.

The amortization of the UAAL is the amount required to fund this difference. It is the amount, expressed as a level dollar amount, necessary to amortize the UAAL. This amortization is over a period of 10 years beginning January 1, 2018. The Executive Summary shows the amortization of the UAAL, called Amortization Payment, compared to that of last year.

Assumed administrative expenses are the average of the prior two years, with each year projected at 2.5% to the valuation date.

The calculated contributions are necessary to meet the Actuarially Determined Contribution for the twelve-month period beginning January 1, 2018.

Financial Data and Experience

As of January 1, 2018, the Fund has a total market value of \$117 million. Financial information was received from Eide Bailly, LLP.

Table 5 under Section III of the report shows a reconciliation of the market values between the beginning and end of 2017.

During 2017, the total investment return on the market value of assets (MVA), as reported by Meketa Investment Group, Inc., was 14.20%, as shown in Tables 7 and 8 under Section III of the report.

In determining the contribution rates and funded status of the Fund, an actuarial value of assets (AVA) is used rather than the market value of assets. The actuarial value of assets is based on the market value of assets with a five-year phase-in of actual investment return in excess of (or less than) expected investment income. Expected investment income is determined using the assumed investment return rate and the market value of assets (adjusted for receipts and disbursements during the year). The returns are computed net of investment expenses. An adjustment is made if the actuarial value is not within 20% of the Market Value. For any year following a year in which the 20% of market value adjustment was applied, the actuarial value is determined as if the adjustment was not applied in the previous year.

The development of the AVA is shown in Table 7 under Section III of the report. The AVA as of January 1, 2018 is \$117 million. The AVA is 100.28% of the MVA as of January 1, 2018, compared to 106.48% last year. The difference between the AVA and the MVA is the deferred gains and losses. As of January 1, 2017, the total deferred loss was \$ 7.6 million. As of January 1, 2018, the total deferred loss was \$0.3 million.

In addition to the market return, Table 7 also shows the return on the actuarial value of assets for the Fund. For 2017, this return was 6.95%. Because this is less than the assumed 7.75% investment return for the prior year, an actuarial loss occurred, increasing the unfunded actuarial accrued liabilities of the Fund by \$0.9 million.

Member Data

Member data as of January 1, 2018 was supplied electronically by the Fund's staff. While we did not audit this data, we did perform various tests to ensure that it was internally consistent, consistent with the prior year's data, and was reasonable overall.

Table 13 under Section III of the report shows the number of members by category (active, inactive, retired, etc.) along with member statistics. Tables 14 through 22 show summaries of certain historical data and include membership statistics.

The total payroll shown on the statistical tables is the amount that was supplied by the Fund, annualized, if necessary.

Total active member payroll decreased 31.28% from last year, compared with no change in the prior year.

Of the 2 active participants, both of them are eligible or will become eligible for normal retirement in 2018.

Benefit Provisions

Appendix B of the report includes a more detailed summary of the benefit provisions for the Fund. Effective July 1, 1981, this plan was closed to new entrants. A brief summary is as follows:

- *Normal Retirement Eligibility*
 - At least 20 years of service.
- *Normal Retirement Benefit*
 - 75.0% of the maximum salary for a fireman first class for the first 20 years of service plus 1.5% of the maximum salary for a fireman first class for each year in excess of 20 years
- *Normal Form of Payment* is a 100% Joint & Survivor Annuity
- *Employee Contributions*
 - None are required
- *Post-retirement cost-of-living adjustments (COLAs)* may be granted each year at a rate of 3.00%.

There have been no changes to plan provisions since the prior valuation.

Actuarial Methods and Assumptions

Appendix A of the report includes a summary of the actuarial assumptions and methods used in this valuation. A few highlights are listed as follows:

- Costs are determined using the Entry Age Normal actuarial cost method, calculated as a level dollar amount.
- The unfunded actuarial accrued liability is amortized over an open 10 year period as a level dollar amount.
- The assumed annual investment return rate is 7.00%, with assumed inflation of 2.25%.
- Payroll is assumed to increase at 0.00% per year.
- Inactive vested participants are assumed to retire 20 years after the participant's date of hire.
- No benefit data is available for members entitled to deferred benefits. The present value of benefits expected to be paid to vested inactive non-retired members is approximated using the data provided.

The average future lifetime for current pensioners is 15.8 years.

The actuarial assumptions and methods were reviewed in detail as part of the 2017 Experience Study covering the five year period ending December 31, 2016. Please see Appendix A for a summary of the new assumptions.

GASB and Funding Progress

Governmental Accounting Standards Board Statement Number 67 (GASB 67) contains certain accounting requirements for the Fund. Schedules, notes and required supplementary information are provided under separate cover.

SUPPORTING EXHIBITS

Table 1
Calculation of Annual Required Contribution
(Assumes 3.00% Annual Cost-Of-Living Increases)

Item	January 1, 2018	January 1, 2017
1. Projected valuation payroll	\$134,155	\$195,221
2. Present value of future pay	\$67,602	\$179,549
3. Employer normal cost	\$22,220	\$41,217
4. Actuarial accrued liability for active members		
a. Present value of future benefits for active members	\$2,555,939	\$3,309,035
b. Less: present value of future employer normal costs	(21,481)	(58,444)
c. Less: present value of future employee contributions	-	-
d. Actuarial accrued liability	\$2,534,458	\$3,250,591
5. Total actuarial accrued liability for:		
a. Retirees and beneficiaries	\$216,078,160	\$193,371,300
b. Disabled members	10,712,958	9,329,477
c. Inactive members	1,544	1,544
d. Active members (Item 4d)	2,534,458	3,250,591
e. Total	\$229,327,120	\$205,952,912
6. Actuarial value of assets (Table 7)	\$117,019,469	\$124,435,245
7. Unfunded actuarial accrued liability (UAAL) (Item 5e - Item 6)	\$112,307,651	\$81,517,667
8. UAAL amortization period	10 years	10 years
9. Assumed payroll growth rate	0.00%	0.00%
10. Employer contribution requirement		
a. UAAL amortization payment	\$15,455,249	\$11,569,172
b. Employer normal cost	22,220	41,217
c. Administrative expense	119,900	124,000
d. Contribution requirement (a + b + c)	\$15,597,369	\$11,734,389

Table 2
Cost Breakdown
(Assumes 3.00% Annual Cost-Of-Living Increases)

Item	Present Value of Future Normal Costs (1)	Actuarial Accrued Liabilities (2)	Total Present Value of Benefits (3) = (1) + (2)
Age and service allowances based on total service and disability benefits likely to be rendered by present active members	\$18,000	\$2,537,939	\$2,555,939
Death-in-service benefits likely to be paid on behalf of present active members (employer financed portion)	597	(597)	0
Separation benefits (refunds of contributions and deferred allowances) likely to be paid to present active members	2,884	(2,884)	0
Benefits likely to be paid to vested inactive members	0	0	0
Benefits to be paid to members due refunds	0	1,544	1,544
Benefits to be paid to current retirees, disabled members, beneficiaries, and future beneficiaries of current retirees	0	226,791,118	226,791,118
Total	\$21,481	\$229,327,120	\$229,348,601
Actuarial value of assets	0	117,019,469	117,019,469
Liabilities to be covered by future contributions	\$21,481	\$112,307,651	\$112,329,132

Table 3
Calculation of Total Actuarial Gain/(Loss)
(Assumes 3.00% Annual Cost-Of-Living Increases)

Item	January 1, 2018
1. Derivation of Experience Gain/(Loss)	
a. Unfunded actuarial accrued liability (UAAL) - previous valuation	\$81,517,667
b. Normal cost (NC) for fiscal year ending December 31, 2017	41,217
c. Actual administrative expenses for fiscal year ending December 31, 2017	114,793
d. Actuarially determined contribution for fiscal year ending December 31, 2017	11,734,389
e. Interest accrual:	
(i) For whole year on (a)	6,317,619
(ii) For half year on (b) + (c) - (d)	(448,662)
(iii) Total interest: (e)(i) + (e)(ii)	5,868,957
f. Change in UAAL due to plan changes	-
g. Change in UAAL due to assumption change	22,951,825
h. Expected UAAL current year: (a) + (b) + (c) - (d) + (e)(iii) + (f) + (g)	98,760,070
i. Actual UAAL current year	112,307,651
j. Experience gain/(loss): (h) - (i)	(13,547,581)
k. Experience gain/(loss) as a % of actuarial accrued liability	-5.91%
2. Approximate Portion of Gain/(Loss) Due to Investments (at Actuarial Value)	(\$932,217)
3. Approximate Portion of Gain/(Loss) Due to Contributions higher or lower than Expected	(\$12,189,097)
4. Approximate Portion of Gain/(Loss) Due to Liabilities: (1)(j) - (2) - (3)	(\$426,268)
a. Age & service retirements	\$96,383
b. Disability retirements	-
c. Death-in-service	19
d. Withdrawal from employment	-
e. Pay increases	-
f. Death after retirement	(895,305)
g. Other	372,636
h. Other as a % of actuarial accrued liability	0.16%

Table 7
Development of Actuarial Value of Assets

Item	FYE 2017	FYE 2016
1. Actuarial value of assets, beginning of year (before corridor)	\$124,435,245	\$130,776,292
2. Market value, end of year	\$116,692,552	\$116,866,234
3. Market value, beginning of year	\$116,866,234	\$123,898,322
4. Non-investment/administrative net cash flow:		
a. Employee contributions	\$0	\$0
b. Employer contributions	-	-
c. Other contributions	-	-
d. Refund of employee accounts	-	-
e. Retirement benefits	(15,410,878)	(15,075,912)
f. Administrative expenses	(114,793)	(116,293)
g. Total net cash flow: [sum of (4a) through (4f)]	(\$15,525,671)	(\$15,192,205)
5. Investments and securities lending:		
a. Interest and dividends on investments	\$2,160,013	\$2,455,652
b. Gross income from securities lending	101,281	53,269
c. Fees and expenses	(1,112,449)	(575,350)
d. Total net income: [sum of (5a) through (5c)]	\$1,148,845	\$1,933,571
6. Investment income:		
a. Actual market return: (2) - (3) - (4g) - (5d)	\$14,203,144	\$6,226,546
b. Assumed rate of return	7.75%	7.75%
c. Assumed amount of return	7,317,894	7,090,835
d. Amount subject to phase-in: (6a) - (6c)	\$6,885,250	(\$864,289)
7. Phase-in recognition of investment income:		
a. Current year: 0.20 * (6d)	\$1,377,050	(\$172,858)
b. First prior year	(172,858)	(2,276,883)
c. Second prior year	(2,276,883)	(762,786)
d. Third prior year	(762,786)	1,478,633
e. Fourth prior year	1,478,633	1,560,646
f. Total recognition	(\$356,844)	(\$173,248)
8. Actuarial value of assets, end of year		
a. Preliminary actuarial value of assets, end of year: (1) + (4g) + (5d) + (6c) + (7f)	\$117,019,469	\$124,435,245
b. Upper corridor limit: 120% * (2)	140,031,062	140,239,481
c. Lower corridor limit: 80% * (2)	93,354,042	93,492,987
d. Actuarial value of assets, end of year	\$117,019,469	\$124,435,245
9. Difference between market and actuarial value of assets	(\$326,917)	(\$7,569,011)
10. Actuarial rate of return	6.95%	7.19%
11. Market rate of return*	14.20%	7.60%
12. Ratio of actuarial value to market value of assets	100.28%	106.48%

* Current year market rate of return is based on unaudited data and is supplied by the plan's investment consultant.

Table 8

History of Investment Returns

Plan Year (1)	Market Value (2)	Actuarial Value (3)
2000	-0.99%	16.60%
2001	-4.47%	10.82%
2002	-9.29%	-2.27%
2003	21.00%	9.43%
2004	11.54%	1.88%
2005	8.22%	4.35%
2006	12.63%	8.23%
2007	7.44%	11.89%
2008	-29.63%	-12.90%
2009	23.72%	18.78%
2010	13.80%	1.84%
2011	-0.90%	-0.44%
2012	14.05%	-0.07%
2013	13.53%	12.29%
2014	4.70%	8.89%
2015	-0.26%	5.84%
2016	7.60%	7.19%
2017	14.20%	6.95%

Average returns:

Last five years:	7.82%	8.21%
Last ten years:	5.02%	4.51%

The market returns above are gross of investment expenses and were provided by the plan's investment consultant. The actuarial returns above are based on the financial information provided by the plan's

* Includes Disabled Members, Beneficiaries, and Deferred Vested Members. Retirement benefit payments for deferred vested members are assumed to commence at the first age at which unreduced benefits are available.

APPENDIX A

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

Summary of Actuarial Assumptions and Methods

The following methods and assumptions were used in preparing the January 1, 2018 actuarial valuation report.

1. Valuation Date

The valuation date for any given year is January 1st, the first day of each plan year. This is the date as of which the actuarial present value of future benefits and the actuarial value of assets are determined.

2. Actuarial Cost Method

The actuarial valuation uses the Entry Age Normal (EAN) actuarial cost method, amortized as a level dollar amount. Under this method, the employer contribution amount is the sum of (i) the employer normal cost amount, and (ii) the amount that will amortize the unfunded actuarial accrued liability (UAAL).

- a. The valuation is prepared on the projected benefit basis, under which the present value, at the investment return rate assumed to be earned in the future (currently 7.00%), of each participant's expected benefit payable at retirement or death is determined, based on his/her age, service, sex and compensation. The calculations take into account the probability of a participant's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his/her terminating with a service, disability, or survivor's benefit. The present value of the expected benefits payable for the active participants is added to the present value of the expected future payments to retired participants and beneficiaries to obtain the present value of all expected benefits payable from the Fund on account of the present group of participants and beneficiaries.
- b. The employer contributions required to support the benefits of the Fund are determined using a level funding approach, and consist of a normal cost contribution and a unfunded accrued liability contribution.
- c. The normal cost contribution is determined using the "entry age normal" actuarial cost method. Under this method, a calculation is made to determine the average uniform and constant percentage amount of employer contribution which, if applied to each new participant during the entire period of his/her anticipated covered service, would be required to meet the cost of all benefits payable on his/her behalf based on the benefits provisions applicable for the individual member.
- d. The unfunded actuarial accrued liability contributions are determined by subtracting the actuarial value of assets from the actuarial accrued liability and amortizing the result over 10 years from the valuation date.

3. Actuarial Value of Assets

The actuarial value of assets is based on the market value of assets with a five-year phase-in of actual investment return in excess of (less than) expected investment income, with interest, dividends, and other income recognized immediately. Expected investment income is determined using the assumed investment return rate and the market value of assets (adjusted for receipts and disbursements during the year). The returns are computed net of investment expenses. An adjustment is made if the actuarial value is not within 20% of the Market Value. For any year following a year in which the 20% of market value adjustment was applied, the actuarial value is determined as if the adjustment was not applied in the previous year.

4. Economic Assumptions

a. Investment return:

7.00% per year, compounded annually, composed of an assumed 2.25% inflation rate and a 4.75% net real rate of return. This rate represents the assumed return, net of investment expenses.

b. Salary increase rate:

4.50% per year

c. Payroll growth rate:

In the amortization of the unfunded actuarial accrued liability, payroll is not assumed to increase. The assumed payroll growth in a closed plan is 0%.

d. Cost-of-living adjustment:

3.00% per year

5. Demographic Assumptions

a. Rates Before Retirement

Healthy Pre-Retirement Mortality:

RP-2014 Mortality Table for Healthy Employees, fully generational, projected with Scale MP-2017

Males: No set back with a multiplier of 100%

Females: No set back with a multiplier of 100%

Healthy Post-Retirement Mortality:

RP-2014 Mortality Table for Healthy Annuitants, fully generational, projected with Scale MP-2017

Males: No set back with a multiplier of 100%

Females: No set back with a multiplier of 88%

Disabled Mortality

RP-2014 Disabled Mortality Table, fully generational, projected with Scale MP-2017

Males: No set back with a multiplier of 100%

Females: No set back with a multiplier of 100%

55	1.81%	1.81%	0.50%	0.50%
60	2.00%	2.00%	0.50%	0.50%

c. Retirement Rates

Age	Rate	Age	Rate
50	20%	57	25%
51	25%	58	25%
52	25%	59	25%
53	25%	60	100%
54	25%	61	100%
55	25%	62	100%
56	25%		

6. Other Assumptions

- a. Percent married: 100.00% of employees are assumed to be married. (No beneficiaries other than the spouse assumed.)
- b. Age difference: Male members are assumed to be three years older than their spouses, and female members are assumed to be three years younger than their spouses.
- c. Percent electing annuity on death (when eligible): All of the spouses of vested, married participants are assumed to elect an annuity.
- d. Percent electing deferred termination benefit: Vested terminating members are assumed to elect a refund or a deferred benefit, whichever is more valuable at the time of termination.
- e. Assumed age for commencement of deferred benefits: Members electing to receive a deferred benefit are assumed to commence receipt at the first age at which unreduced benefits are available, which for this plan is 20 years after hire date.
- f. No benefit amount data is available for members entitled to deferred benefits. The benefit is estimated using the final average compensation and service provided by WRS.
- g. There will be no recoveries once disabled.
- h. Administrative expenses: Assumed to be the average of the prior two years, with each year projected at 2.5% to the valuation date.
- i. Pay increase timing: Beginning of (fiscal) year. This is equivalent to assuming that reported pay represents amount paid to members during the year ended on the valuation date.
- j. Decrement timing: Decrements of all types are assumed to occur mid-year.
- k. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- l. Benefit Service: All members are assumed to accrue one year of service each year.

APPENDIX B

SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions

Covered Members	Any person who is a member of Wyoming Paid Firemen's Retirement Fund Plan A. This plan only covers members hired prior to July 1, 1981.
Fireman First Class	The highest salary grade which a fireman can obtain within his department without any promotion in rank. The term specifically excludes chiefs, officers, engineers, fire equipment operators, secretaries, mechanics, inspectors and all other specialized grades, ratings and ranks.
Form of Payment	Monthly benefit for life. Upon death, 100% of the benefit continues to be paid to the beneficiary.
Service Retirement	
Eligibility	20 or more years of service.
Monthly Benefit	75.0% of the maximum salary for a fireman first class for 20 years of service plus 1.5% of the maximum salary for a fireman first class for each year of service in excess of 20 years.
Vesting	Any employee who has left the service with at least 10 years of service, and who has not withdrawn accumulated contributions, is eligible to receive a monthly benefit of 3.75% of final average salary per year of service payable upon the 20 th anniversary of employment, or can elect to receive a lump-sum refund of 99.5% of contributions. An employee who terminates with less than ten years of service is only eligible for the lump-sum benefit.
Disability Retirement	
Eligibility	No age or service eligibility requirements. Partial or total disability resulting from an individual and specific act, the type of which would normally occur only while employed as an employee, or as otherwise defined under W.S. 15-5-204.
Monthly Benefit	75.0% of the maximum salary for a fireman first class for 20 years of service plus 1.5% of the maximum salary for a fireman first class for each year of service in excess of 20 years.

Pre-retirement Death Benefit

Eligibility	No age or service requirements.
Monthly Benefit	75.0% of the maximum salary for a fireman first class for 20 years of service plus 1.5% of the maximum salary for a fireman first class for each year of service in excess of 20 years.

Contributions

Employee	None
Employer	None
Interest	None

Cost-of-Living Improvements	3.0% per year, applied annually following the one-year anniversary of retirement. In the event the most current actuarial valuation indicates the market value of assets is greater than 115% of the actuarial value of liabilities, the Board may elect to grant up to a 5.0% increase if the System's actuary determines such an increase to be actuarially sound.
